	Surname: Hoyos		
	Name: Ignacio		

Activity 1: NullPathTimes

TABLE1 (times in milliseconds WITHOUT OPTIMIZATION)

n	tAcumulated/100
5	0.06
10	130.44
15	OoT
20	OoT
25	OoT
30	OoT

According to the code it must have a factorial complexity, and looking at the incredible fast increase in the taken time, it seems so, which is no surprise since we are doing backtracking. But even taking that into account it looks like I have a higher complexity than expected because doing a fast calculation it would take me years to complete $n=20$.
