Activity 1: Divide and Conquer by subtraction

TABLE1 (times in milliseconds WITHOUT OPTIMIZATION)

n	Time
8	5,98
16	9,96
32	29
64	118
128	450
256	1 897
512	5 707
1024	16 384
2048	68 615 (OoT)
4096	OoT
8192	OoT
16384	OoT
32768	OoT
65536	OoT

My programed algorithm have a complexity of $O(n^2)$ which is pretty similar to the achieved results times, for example being $n=512 \rightarrow t=5707$, with $n=1024$, t should be 22828 and its 16384, something less but it adjust to the complexity.
